

Photos taken during MRCE's investigation show the displaced retaining walls.

Rutgers University Stadium Damage Investigation

Piscataway, NJ

Mueser Rutledge Consulting Engineers (MRCE) provided geotechnical engineering services for the stadium at Rutgers University. MRCE's services included investigation, analysis, and remediation regarding the retaining walls that were displaced due to slope instability.

Additionally, MRCE prepared construction documents for compact grouting and slab jacking for the repair and upgrade of the existing highway structures and embankment slopes.
