

Mueser Rutledge Consulting Engineers

The New York University Medical Center Campus (top center) includes numerous buildings on which MRCE has worked. Among them (left to right) are the Smilow Research Building, the Skirball Institute of Biomolecular Medicine, and the Clinical Cancer Center.

New York University Medical Center New York, NY

Mueser Rutledge Consulting Engineers (MRCE) has been involved in the design and inspection of foundation construction for a majority of the buildings at the NYU Medical Center complex. The site's geology has resulted in difficult groundwater and foundation conditions in all construction situations. MRCE has also provided solutions for remediating groundwater infiltration into the basements at several complex structures. A listing of the facilities on which the firm has worked includes:

- Medical Science Building
- Medical School at Kips Bay
- Staff Housing and Office Building, 1st Avenue and 32nd Street
- University Hospital, Basement Slab Modification
- Clinical Cancer Center
- New Incinerator, 1st Avenue and 31st Street
- MRI Medical Science Building
- Medical Science Library
- Alumni Hall
- Kips Bay Building
- 145 East 32nd Street
- 545 1st Avenue Apartments
- Health Care Center (former Ambulatory Care Pavilion)
- Tisch Building
- Bulk Storage Facility
- Skirball Institute of Biomolecular Medicine
- Joel and Joan Smilow Research Building
